

Sewer Field Investigation Work to Begin December 28

On Monday, December 28, 2015, C & K Industrial Services will begin field investigation work on West 227 Street north of Lorain Road, West 229 Street north of Lorain Road, and Clifford Drive between West 229 and West 227 Streets. C&K Industrial Services will be performing closed-circuit television (CCTV) inspections of the sanitary sewers to collect sewer data for the City of Fairview Park. As part of the CCTV work C&K Industrial Services will be putting green dye into the storm sewers to check for inflow and infiltration into the sanitary sewer system.

Beginning Monday, December 28 until Friday, January 8, we are advising residents not to park on these streets directly over or within 100 feet of a manhole.

This project is being done to facilitate the completion of engineering plans needed in order to make improvements to the sewer system to reduce and eliminate basement flooding and sewer back-ups in the neighborhood. The City thanks you in advance for your cooperation as we move forward with this important project.

Sincerely,

Rob Berner
Director, Public Service & Development
