RESOLUTION NO. 16-

REQUESTED BY: COUNCILMAN MCDONOUGH

SPONSORED BY: COUNCILMAN MCDONOUGH

CO-SPONSORED BY: COUNCILMEMBERS MINEK, WOJNAR, HINKEL, RUSSO,
CLEARY AND COUNCIL PRESIDENT KILBANE

A RESOLUTION RECOGNIZING APRIL AS SEXUAL ASSAULT AWARENESS
MONTH IN THE CITY OF FAIRVIEW PARK AND DECLARING AN EMERGENCY

Whereas, Sexual Assault Awareness Month calls attention to the fact that sexual violence is widespread and impacts every person in this community; and

Whereas, rape, sexual assault, and sexual harassment harm our community, and statistics show one in five women and one in 71 men will be raped at some point in their lives (Black et al., 2011);and

Whereas, child sexual abuse prevention must be a priority to confront the reality that one in six boys and one in four girls will experience a sexual assault before age 18 (Dube, et al., 2005); and

Whereas, young people experience heightened rates of sexual violence, and youth ages 12-17 were 2.5 times as likely to be victims of rape or sexual assault (Snyder & Sickmund, 2006); and

Whereas, on campus, one in five women and one in 16 men are sexually assaulted during their time in college (Krebs, Lindquist, Warner, Fisher, & Martin, 2007); and

Whereas, we must work together to educate our community about sexual violence prevention, supporting survivors, and speaking out against harmful attitudes and actions; and

Whereas, prevention is possible when everyone gets involved. The first step is increasing education, awareness, and community involvement. It's time for all of us to take action to create a safer environment for all.

**THEREFORE, BE IT RESOLVED, BY THE COUNCIL OF THE CITY OF FAIRVIEW
PARK, COUNTY OF CUYAHOGA AND STATE OF OHIO:**

RE: City Hall Controls Upgrade

Dear Mr. Bridegum,

Per your request, the Brewer-Garrett Company has evaluated the existing controls servicing The City Hall and has determined that they are far beyond their useful life.

The Brewer-Garrett Company recommends replacing the Honeywell DDC controllers with non-proprietary, open protocol, web-based controllers. These controllers will utilize Tridium which runs on the Niagara Platform.

- Replace the six (6) Honeywell Controllers with new JEC-334s (cutsheet attached).
- Replace all existing temperature sensors with new. Existing wiring will be re-used
- The currently stand-alone boilers will be integrated into the new system.
- Provide a graphical interface to all connected systems and points.
- Provide scheduling and trending capability.
- Provide 8 hours of training. 4 hours will be provided at the completion of the job and 4 hours will be provided after 3 months of operation to address all questions that have surfaced.
- The system will be fully commissioned to identify any non-functional mechanical components. A detailed report quantifying these issues will be generated to assist the city in planning for future expenditures.

Please consider the following notations and clarifications as part of the above proposal:

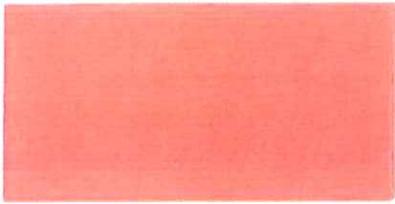

- The city will be responsible for providing network drops to the 4 existing controller locations.
- All existing actuators, valves, dampers, and motors will remain.
- We exclude abatement of hazardous materials.
- We exclude sales tax.
- All labor is based upon normal working hours Monday through Friday, shift premium is not included.

The price for the above work is.....\$ 32,250.00

Thank you for considering The Brewer-Garrett Co. as part of your design team. If you have any questions or need additional information, please do not hesitate to contact this writer.

Very Truly Yours,
The Brewer-Garrett Company

ACTIVITY DESCRIPTION- Maximum 1 page

The City of Fairview Park ("City") is seeking \$136,400 in grant funding to make targeted repairs to unsafe and deteriorating sidewalks and curb ramps located throughout Fairview Park's Improvement Target Areas (ITA) and Low and Moderate Income (LMI) areas. Based on an estimate from our City Engineer (attached), a grant award from Cuyahoga County would allow the City to make repairs to approximately 15,500 square feet or 3,100 linear feet of 5' wide concrete throughout the community. All engineering and construction administration costs for this project will be the responsibility of the City.

Identification of areas in need of repair is accomplished in two ways. First, City staff visually inspect the quality of sidewalks and curb ramps in Fairview Park as part of its annual property maintenance program. Second, the Fairview Park Building Department collects and inventories sidewalk complaints submitted by residents via telephone.

The primary objective of this project is to provide a safe and reliable physical environment in which to travel by non-motorized means. The project is designed to serve all visitors to and residents of Fairview Park, including the low and moderate income residents who comprise 25% of our population. It is the City's intent to ensure that all residents, especially those unable to own a personal automobile, have the ability to safely and conveniently reach basic amenities in Fairview Park like grocery stores, pharmacies, recreational assets, and RTA bus routes. All curb ramp repairs undertaken will be done in full accordance with the Americans with Disabilities Act.

Municipal Grant funding is essential for this project to move forward. The City is proposing a 2016 General Fund operating budget of \$11 million, of which approximately 70% is encumbered for personnel costs. The remaining 30% pays recurring costs for city services like trash and recycling disposal and emergency dispatch, as well as routine facility maintenance costs and daily operating expenses for nine administrative departments and City Council. The budget leaves little discretionary funding for one-time projects like the project proposed here. As a result, the City must seek out alternative funding sources like the Municipal Grant in order to successfully implement such projects while maintaining a healthy, balanced budget.

ACTIVITY IMPACT- Maximum 1 page

COMMUNITY IMPACT

Targeted sidewalk repairs are necessary to improve the safety of non-motorized travel through Fairview Park. The City of Fairview Park ("City") is a typical inner-ring suburban community in that it must contend with aged infrastructure. Approximately 87% of Fairview Park homes were constructed during or before the 1960's. In many cases, the accompanying sidewalks are well past their useful lives and have deteriorated due to exposure to the elements or been raised and cracked by tree roots. Meanwhile, these sidewalks are being increasingly utilized by residents due to active lifestyle choices and/or financial necessity. The old, broken, and raised segments of sidewalk must be repaired to ensure the safety of our residents and community visitors.

The City anticipates the proposed project will produce a number of beneficial outcomes. The direct outcomes of the project will be decreases in both the number of unsafe sidewalk panels and the number of property maintenance violations present in Fairview Park's ITA and LMI areas. We anticipate the number of sidewalk complaints received by the Fairview Park Building Department will also decrease as a supplemental benefit of the project.

The walkability and bikeability of Fairview Park and its neighborhoods are expected to improve as a result of the project. The City expects that an investment in neighborhood sidewalks will encourage their use by community members, thereby producing a number of indirect health and economic outcomes. This expectation is based on a large volume of existing research that shows a walkable, bikeable community promotes exercise and reduces the risk of obesity, lowers car crash fatalities, and reduces greenhouse gas emissions and vehicle-related air pollution. In addition to these health benefits, a walkable community can facilitate the upward economic mobility of low and moderate income individuals by providing reliable, affordable transportation alternatives to owning a car.

This project idea was presented to Fairview Park City Council as part of a slate of possible projects. It received unanimous approval from City Council members, who are on the front line of communicating with residents and understanding the needs of the community.

PLANNING AND DEVELOPMENT IMPACT

The proposed project complements a number of the City's current planning and development initiatives. A point of pride for Mayor Eileen Patton's administration has been the tireless pursuit of activities identified in three citywide master plans completed since 1999. The current master plan, completed in March of 2013, repeatedly stresses the importance of promoting pedestrian access throughout the community. See the application attachments for a sample of the 2013 master plan. The proposed project will benefit the pedestrian travel environment by improving the safety of non-motorized travel.

Another important development initiative underway is the revitalization of the Lorain Road business corridor. This initiative is multi-faceted and involves everything from direct interactions with commercial property and business owners to encourage financial investment, to a start-up resident advocacy group tackling business attraction, to leveraging federal grant dollars for infrastructure improvements on Lorain Road. Another key project component will be encouraging the residents living in close proximity to Lorain Road to visit our local business amenities. Quality infrastructure resulting from the proposed project will make it convenient and safe to walk or bike to the Lorain Road corridor.

Improving pedestrian access also ties into the mission of the Fairview Park Safe Routes to School program. The Fairview Park community embraced this national program and developed a committee in 2013 whose mission is "to work to encourage students and parents to walk and bike, provide increased access for pedestrians, and engage the community, all to create a safe environment for students to travel to and from school." This collaboration is comprised of numerous community stakeholders including the City, Fairview Park City Schools, Cleveland Clinic, Cuyahoga County Board of Health, local businesses, parents, and residents, and offers events and programs designed to encourage more walking and biking amongst our local students. The proposed project will ensure quality infrastructure our students can use to walk and bike to school and around the community.

City-wide Master Plan Update

Assets & Destinations

Pairing the most valued and frequented **assets and destinations** from the resident survey shows overlaps and reveals a hidden network of Fairview Park's most important amenities. Studying the location and proximity of these amenities throughout the city shows an underlying need to emphasize a series of connections. These routes may be based on **walkability, automobile access, bus routes or bike networks** depending on the user, their needs and familiarity with city. Connecting assets with each other and with popular destinations creates a **city-wide network** that can **promote local businesses, recreation and healthier lifestyles**, for residents and visitors. By linking the city parks to the larger park system, the Reservation is extended into the neighborhoods and becomes a greater internal asset. Bike trails and better pedestrian access on major roadways could promote different means of travel within the city, encourage consumers to shop close to home, and **promote the city's identity as a balanced inner – ring suburb**.

The result is a need to develop **Fairview's Park Multi-Modal System** and in turn link the assets and destinations within the city to each other while creating the infrastructure network for future development.
